ANONYMOUS QUALITY EVALUATING OF THE DOCTORAL STUDY FROM STUDENTS' POINT OF VIEW

Dear colleagues,

all universities are interested in good function of their faculties.

Therefore from time to time the work of departments and institutes but also study departments and other services are assessed summatively. One of the data used for evaluation are also students opinions about the quality of provided education. We address you to ask for serious assessment of what you have been taught at the faculty in general and in what ways.

We ask you for summarized assessment of your study so far. It is a pilot testing examination. Rectors of universities will receive the data from their school to be able to carry out detailed analysis.

Thank you for cooperation.

We asked you for assessment of the graduated teaching of your actual study programme and running of faculty. If you study more programmes simultaneously, choose one from which perspective you will assess the faculty. We are interested in your own subjective view. Mark the option which according to you best expresses your opinion by crossing one box ☒. If you want to change your choice, blacken out the first box ☐, and then cross your new answer ☒. In most scales there is a choice "I do not know the answer", which is meant for questions irrelevant to your study programme. Fill in the questionnaire with a black or blue pen.
